

A top-down view of three cups of coffee on a rustic wooden table. One cup is in a white ceramic cup on a matching saucer with a black spoon. The other two are in glass cups. The wood grain is prominent, and there's a small insect-like mark on the table.

# *Everything to make coffee even better*

Dear NIVONA retailer,

Can you still remember your last trade fair with us? The espresso and the conversations at our stand? We wish we could have made this possible again in 2021 at the IFA in Berlin. But there are challenging months ahead in many respects. That is why we decided that we would have to miss out on Berlin again this year.

Besides, we can present our new products this year to you more effectively and safely via other channels. For example, with this new brochure, which you can also distribute to your employees and colleagues.

In addition to our new accessory items from the last few months, we would also like to show you the four new 7 series models here. High-quality material meets aesthetics meets cappuccino at the press of a button. All in a more modern design.

We hope to see you again soon for an espresso or cappuccino.

We'd be glad to visit you at a trade fair or at your premises.

Until then, best regards

Your NIVONA team

# 7'er

*Cappuccino so  
delicious,  
you could  
just hug it.*

## *Convenience maker*

It is still one of the key advantages of our 7 Series: Cappuccino and latte macchiato at the press of a button. That is why we have added to the four new models. In their design and equipment. Here is where high-quality material meets aesthetics.

The operating concept works with just one button, while the menu guides you intuitively through the world of coffee.

In addition, we have added a new feature to the aroma technology: In previous models, the Aroma Balance System made it possible to alter the brewing process directly while it was running – we have of course retained this feature in the new models.

With the new Cappuccino-Connoisseur, the order of milk and coffee can now also be adjusted when a cappuccino is drawn.

Because coffee connoisseurs know: The milk must actually envelop the coffee. NIVONA gives you the choice. Everything to suit your personal taste.

*Coffee love at  
**the press  
of a button.***

The new models in the 7 series are suitable for all lovers of cappuccino and milk-based drinks.

The perfect fully automatic machines for unique coffee moments.

- ▶ Cappuccino and latte macchiato at the press of a button.
- ▶ Barista-style cappuccino with aroma technology (Cappuccino-Connaisseur)
- ▶ Simply save your favourite coffee live
- ▶ Convenient milk system cleaning
- ▶ Intuitive operating concept
- ▶ TFT colour display

*Impressively  
simple.  
Neat **and** clean.*

#### **Milk lance**

The NIVONA milk lance is the practical way to get milk directly into the NIVONA machine. How? Quite easily.

- Put the NIVONA milk lance in the carton.
- Insert the NIVONA fully automatic coffee machine's milk tube into the milk lance's adapter.
- That's it!
- It can then be quickly put back in the fridge after use. Until the next cappuccino.
